Projects

ShopLy — Multi-Vendor E-Commerce Platform | Spring Boot — React — Redux Toolkit — MySQL — JWT

- Designed and developed a multi-vendor e-commerce platform with separate Customer, Seller, and Admin modules, secured using JWT authentication and Role-Based Access Control (RBAC).
- Designed and developed 30+ production-ready RESTful APIs covering authentication, products, categories, cart, checkout, orders, seller approval, reviews, and banner management using Spring Boot, Spring Security, and Hibernate ORM.
- Integrated Razorpay for secure payments and Cloudinary for product image uploads; managed frontend state with Redux Toolkit and styled UI with Tailwind CSS.
- Deployed frontend on Vercel and backend on Render with MySQL hosted on Railway; project is fully live and under active feature development.
- GitHub Live Demo

EduZen — Coaching Centre Management System | Spring Boot — React — MySQL — JWT

- Built a full-stack coaching management system with secure Admin and Student modules.
- Implemented JWT authentication, Spring Security, RESTful APIs, student registration, fee management, and approval workflow.
- Integrated React frontend with Spring Boot backend using MySQL and documented APIs with Swagger UI. GitHub
